

Continuous Education in Radiation Protection

Dr. Natalia Saltybaeva

Medical Physicist SSRMP, Radiation Protection Unit, USZ

Imaging during pregnancy: Risks assessment and dose estimation

For medical doctors of all specialties

We will answer the following questions:

- What are the risks associated with radiological examinations for a patient during pregnancy?
- How to assess fetal dose from x-ray based procedure?
- How to counsel patients on the dose and radiation related risks?

Credits: 2 units continuous education in radiation protection

Universitätsspital Zürich
Kleiner Hörsaal OST, HOER B5
29.11.2023 16:15 – 18:00
virtual classroom or in-class lecture
